Inspire • Learn • Grow

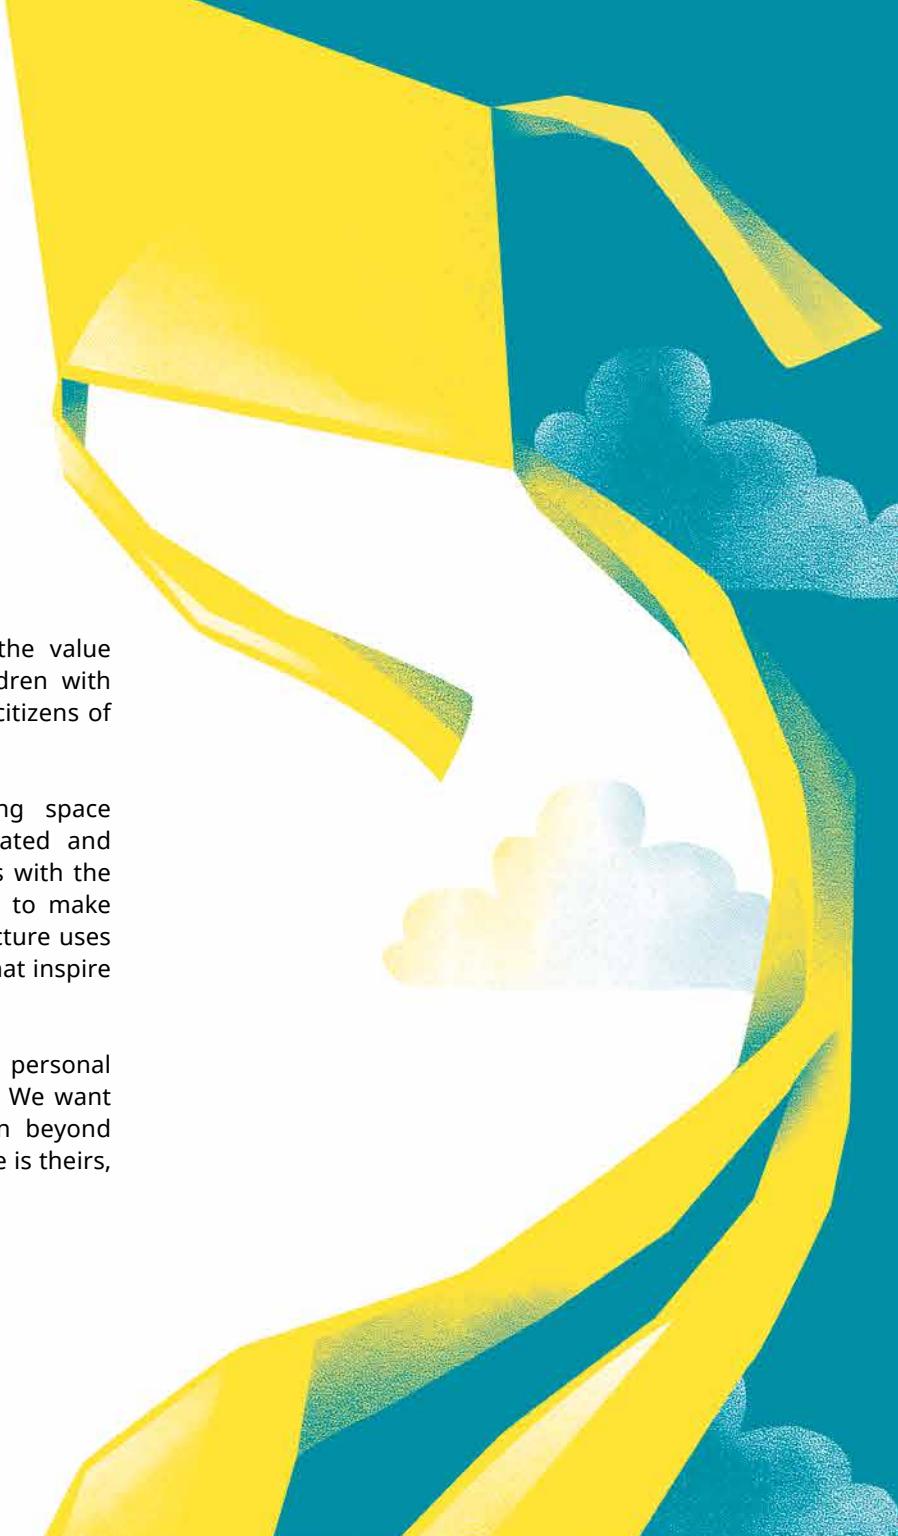

The Edumont way

At Edumont World School, we believe in the value of childhood. We believe in educating children with great responsibility for making them global citizens of tomorrow.

This begins with creating a safe learning space for students, where individuality is celebrated and possibilities are explored. Masterful teachers with the help of a stimulating curriculum are driven to make students, interested learners. The infrastructure uses indoor and outdoor learning environments that inspire curiosity and challenge students to excel.

Our goal for every student is 'academic and personal success' that builds hope for a great future. We want them to be able to extend their education beyond classrooms and outside the school. The future is theirs, and we prepare them in the best way for it!

The Learners

What is it like to be a student at Edumont?

A student in our care acquires a deep desire to be a life-long learner and is the one who is happy, secure, curious and confident.

In the end, we want our young learners to have personal goals for their futures that they are confident enough to pursue.

Study

For us, success in academics is not only associated with good grades but also with the application of acquired knowledge in real life.

- We follow an ICSE like curriculum for project and application based learning.
- We currently cater to Class Nursery-Grade 6.
- Value education is included in our core curriculum.
- Lessons are taught on interactive boards in classrooms.
- Parents' involvement is encouraged with ERP Solutions.
- Teachers practice differentiated learning in classes with individual attention to students.

Play

We take sports seriously and encourage it thoroughly. Through sports, students take responsibility for personal growth, and develop integrity and commitment. Sports also teach time management, goal setting, work ethics, leadership and sportsmanship, as well as learning to deal with adversity and difficulty, with courage. This is why sports is an integral part of life at Edumont.

Co-curricular

At Edumont, we believe that learning goes beyond classrooms and that makes us value co-curricular all the more. Whatever be the medium, students' creativity and talent always find the spotlight at Edumont. This is what makes us different and, more importantly, what brings us together. We want our students to have a 'voice' to explore and broadcast experiences and perspectives through

- Dance
- Music
- Arts
- Craft
- Public speaking
- Group discussion
- Inculcating team spirit through activities

The Teachers

What drives our teachers?

Our committed teachers wear many hats - a tutor, a coach, a friend and a parent; they are at the heart of making the learning process truly meaningful.

Education doesn't have to necessarily reform students or make them excel in their exams. The purpose of education is to expand horizons, incubate curiosity and enable children to think for themselves and others, rationally and responsibly. At Edumont, we do not prepare roads for the students, but students for the roads.

Sarvprit Kaur
Principal

I think education should be an experience for the child. The curriculum should be designed to encourage the child to think and develop an understanding of a topic rather than cramming information in his/her head. Here, activity-based learning becomes imperative. It exposes students to learning methods that go beyond the four walls of the classroom. It makes learning a practice of fun and enjoyment. It also offers the quintessential exposure that young minds need to prosper and be tomorrow-ready.

Himani
Activity Incharge /Coordinator

At Edumont, students are motivated learners and observers. They learn from the environment around them and their daily experiences at school. We want to free our children from practices like rote learning. We wish to create a space where they are nurtured by counselling, care and guidance that helps them flourish and grow throughout their school life.

Priti Singla
Science Teacher

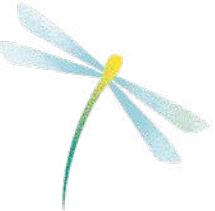

The Campus and Infrastructure

What makes Edumont a place of joy and wonder?

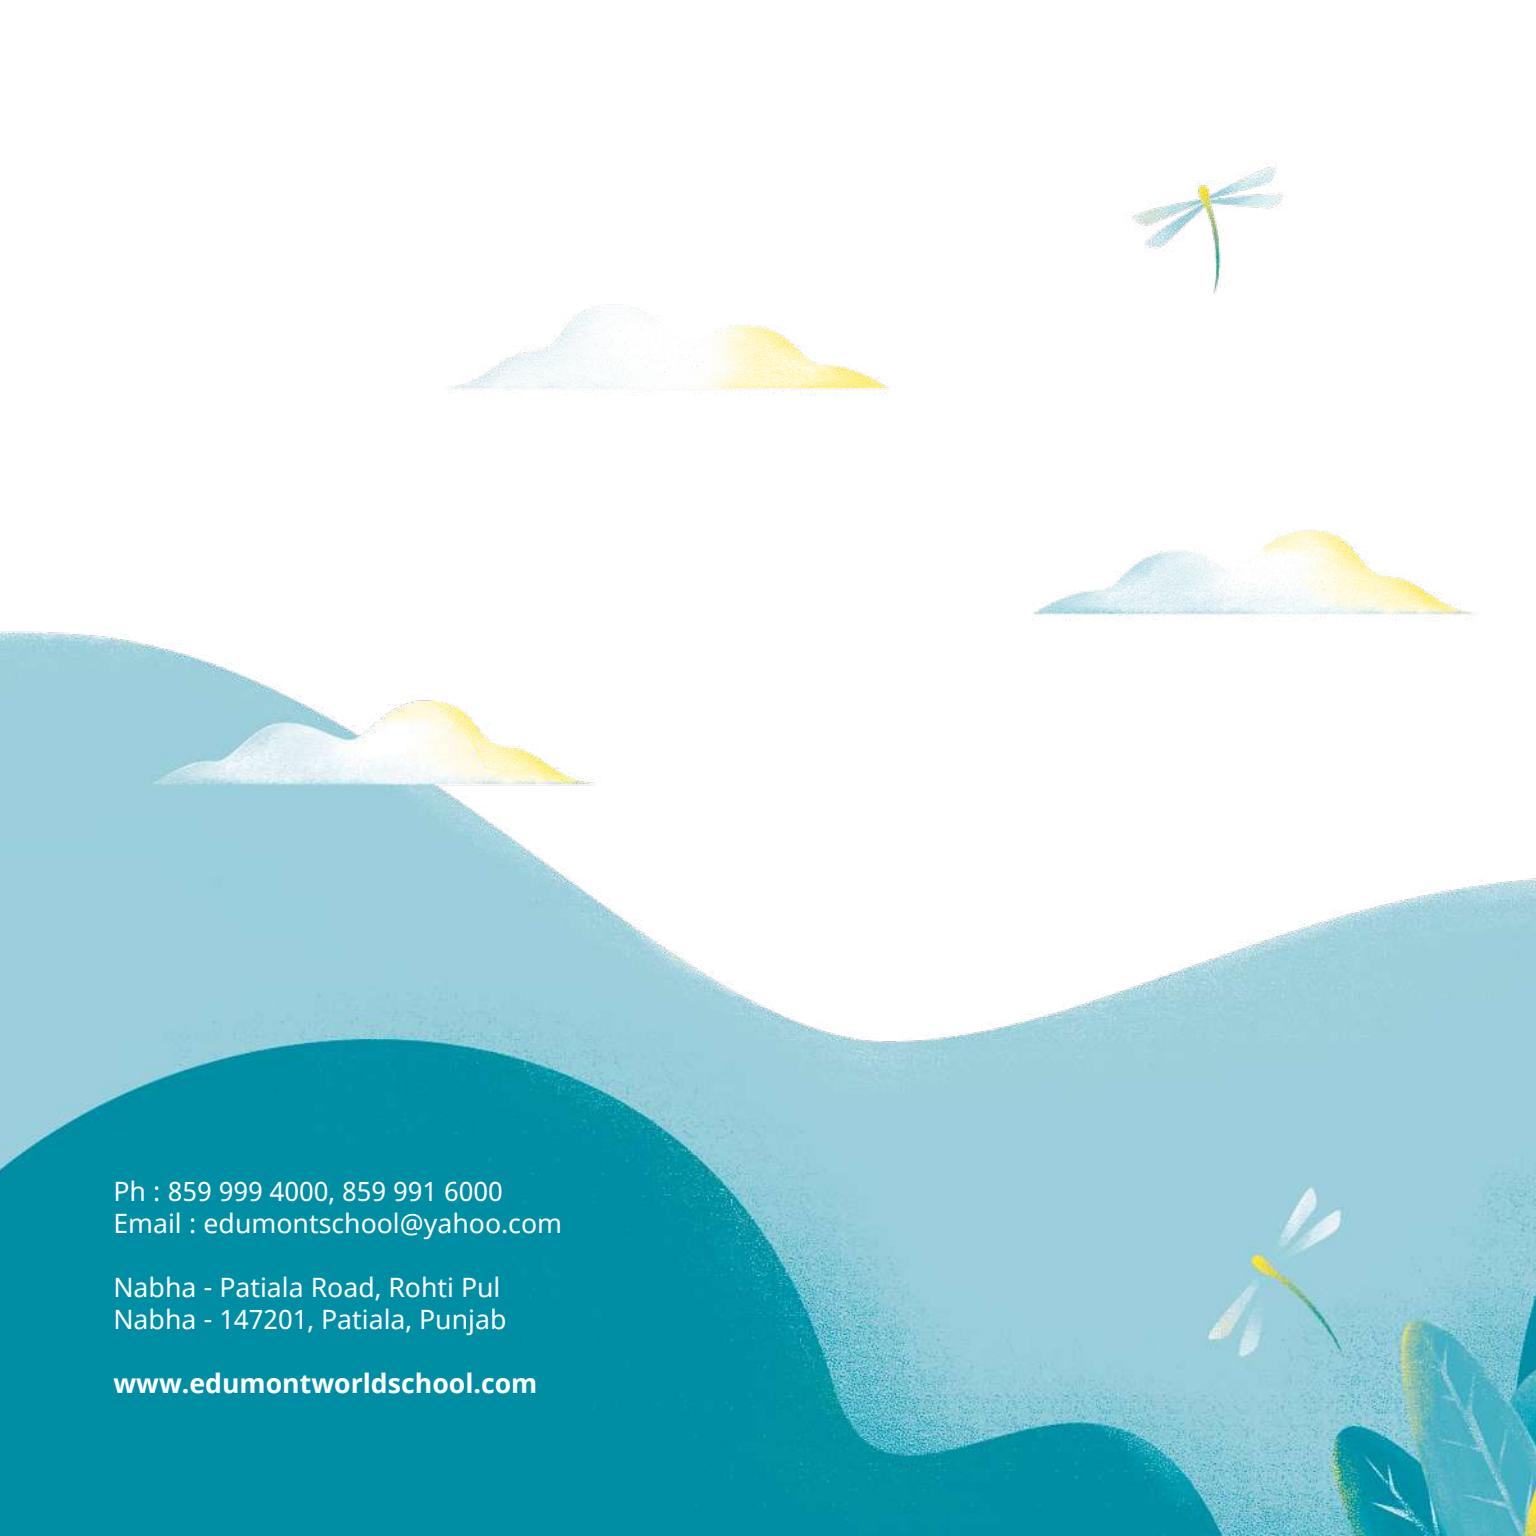

We believe that school is the second home of a child. We have built a learning space where a student is safe and well-equipped to receive a fulfilling education.

- A lush green campus (fully landscaped)
- Classroom equipped with audio-visual technology
- Fully air-conditioned campus
- CCTV equipped campus
- Interactive classrooms
- Medical infirmary
- Activity hall
- Playing arenas
- Computer labs
- Library
- Conference room
- Splash pool
- Badminton court
- Lawn-tennis court
- Basketball court
